Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 19-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 19, 20, 25, 26 recite the limitation of "said filter being operable to filter the n-level digital mapped signal" wherein "the filter having a VSB characteristic, which covers a frequency band including a carrier frequency, and a roll-off characteristic, which covers a frequency band not including the carrier frequency". The support in the specification, as stated in the Remarks (page 6), however, simply describes "the filter" as FIR filters for weighting the signals with roll-off characteristics and the filter outputs are orthogonal to each other (col. 59, lines 50-col. 60, line 24).

Claims 21 and 27 recite the limitation of "a filter for filtering the n-level digital VSB modulated signal with a filter having a VSB characteristic, which covers a frequency band

including a carrier frequency, and a roll-off characteristic, which covers a frequency band not including the carrier frequency, to produce an n-level digital mapped signal, and de-mapping the n-level digital mapped signal to the data stream including the audio and video information.” Nonetheless, such VSB filter and de-mapper is not described in the section of the specification indicated in the Remarks.
